4-Piece Random Paver Pattern

Scale: 1/4" = 1'-0" • field shown 64' x 37' • 3' x 3' module repeats continuously

0' 5' 10'

Print at 100% (actual size) on 11 x 17 to keep the scale. Each small square (A) = 6" x 6".

Repeat Module & Piece Schedule

One 3' x 3' module (6 x 6 units of 6"). Lay modules side by side to continue the pattern.

Piece schedule (per module)

Piece	Size	Qty	% of area
A	6" x 6"	4	11%
B	12" x 6"	3	17%
C	12" x 12"	5	56%
D	18" x 12"	1	17%
Total		**13**	**9 sq ft**

Estimating: per 100 sq ft, about 11.1 modules = A 44 • B 33 • C 56 • D 11 pieces (before waste).

Sizes assume a 6" module. If your product line uses different nominal sizes, scale proportionally — the layout and ratios stay the same.
